

Game Draft: "Escape from the Pyramid"

Backstory: You're trapped in a pyramid after exploring for treasure. Three doors appear, and you must find a way to escape.

Components:

- **Main Room:** Starting point outside the three doors.
- **Door 1:** Initially appears empty but hides a room with a key and Letter(activated by the blue button in Door 3).
- **Door 2:** Locked, opens with a key, reveals a hidden room with a pin-locked door.
- **Door 3:** Has a red button (instant death), a blue button (provides treasure and reveals trap Door) and a blue button (unlocks door two revealing pin-locked door)

Props:

- **Key**
- **Treasure**
- **Red Button**
- **Blue Button**
- **Green Button**
- **Letter:** Mentions the significance of the key "123" and provides a hint for the pin code.

Gameplay:

Door 1: Conceals a hidden room accessible when the blue button in Door 3 is pressed. This room contains a key and a letter which gives a hit to the pin for the pin locked door in room 2.

Door 2: Initially locked, opens with the key from Door 1 or by pressing the green button in door 3. Inside, find a pin-locked door and a hidden room with two doors: one leads to a creative death, and the other lets you escape.

Door 3: Presents a red button (fatal) and a blue button (Treasure and removes fake wall). The letter hints at the importance of the key "123" and gives clues for the pin code in Door 2. Remember: The key "123" is crucial for survival and escaping the pyramid.

Winning:

Official way: In Room 3, click the blue button for a treasure, revealing a key and a letter hinting at pin 123. Open Door 2 with the key. Use pin 123 on the pin-locked door in Room 2. After passing, choose the right door in the next room.

Alternative way: Click the green button in Room 3 to open Door 2 directly. Guess the pin (5 tries max) for the pin-locked door. If correct, choose the right door in the next room to win.
